Compact Design Meets Smart Performance in ADO Air 20

Urban riders often need a bike that adapts to limited space and changing travel routines. The ADO Air 20 answers this need with its compact folding structure and smart assistance system. The bike’s responsive motor and torque sensor ensure smooth power delivery, even in stop-and-go city traffic. Integrated safety features like reliable brakes and built-in lights enhance confidence during early morning or evening rides.

For riders seeking a balance between portability and performance, the ADO Air 20 delivers a well-rounded commuting experience.
